

2022

BUDAPEST/HUNGARY
May 11 - 13, 2022

**13th EUROPEAN SYMPOSIUM
OF PORCINE HEALTH MANAGEMENT**

Abstract review process: guidelines for abstract evaluation

All abstracts will be evaluated by two different and independent reviewers, who are members of the International Scientific Committee.

Steps in the review process

- 1.** Reviewers evaluate each abstracts for both **scientific quality** and **practical implications** by scoring them on a 1 to 10 scale for each of the two parameters (1 = very low, 10 = very high). In conclusion, abstracts can receive a minimum of 4 points and a maximum of 40 points in total.
- 2.** Reviewers make recommendations whether abstracts should be accepted as **oral communication, flash poster presentation or poster**.
- 3.** Reviewers also make recommendations regarding the final conclusion among these options: **accepted, minor revision, major revision, rejected**.

Selection procedure of ORAL presentation – only for abstracts where authors opted in for an oral presentation

- 1.** Abstracts are ranked top to the bottom within each topic according to their total score (40 to 4 points) and filled into the slots of the particular session; usually there are 6 slots available per session.
- 2.** Selection as 'oral presentation' only, if not both reviewers recommend the abstract for 'poster'.
- 3.** Selection as 'poster', if the same author has already an oral presentation in the same or another session.

Selection procedure of POSTER FLASH TALKS presentation – only for abstracts where authors opt for a poster flash talk

- 1.** Abstracts proposed for oral presentations or flash talk presentation and not selected as oral presentation are ranked top to the bottom according to their total score (40 to 4 points).
- 2.** Selection from top to the bottom as 'poster flash talk', if not both reviewers recommend the abstract for 'poster'.
- 3.** Selection as 'poster', if the same author has already an oral presentation or poster flash talk in the same or another session
